REPORT OF SUPERINTENDENT OF SCHOOLS

To School Board of Greenland:

I call your attention to the statistical tables given herewith which contain partial summary of data reported to State Department last July. Table II shows the promotions and retardations in June, 1912. Such movement of pupils has been in accordance with my plan as stated in my report of last year. Altho the percentage of promotion was a little below the state average, I feel that every pupil was placed where indications seemed to warrant most profitable work. The same plan will be in operation this year.

The operetta and exhibition of school work held on Mar. 22 was, according to all reports, well received, and, from the collection, sufficient funds were received to clean, repair, and tune the piano and buy a scarf for it. It is now in very good shape and there is money enough to varnish and tune it, which will be done soon. No public entertainment is planned at present for this year, tho an exhibition of class room work will be held later in the year.

At the beginning of the Fall Term, 1912, 46 pupils were enrolled at the grammar building and 40 at the primary, the rooms lacking three and two seats respectively. Six adjustable chairs and desks were bought and placed where needed. At present there 45 pupils

in the grammar and 36 in the primary room, distributed in grades as per table II.

Class work is progressing favorably with same teachers as last year except Miss Marshall from Plymouth Normal School is principal at the grammar building in place of Miss Furber, who left to complete work at normal school. The same course of study as last year is followed. Semi-term reports to parents take place of quarterly reports; daily plan books are used instead of monthly reports of class work and term summary for permanent records in place of the same lately issued quarterly. All these and some other ways and means for keeping a desirable record of school affairs are on file for your inspection at any time and are in such form that they may be continued should the town be arranged in any other supervisory plan.

Several books have been added to the equipment. These include, for grade VIII, *Evangeline* and *Vision of Sir Launfal*; for grade VII, *Miles Standish* and *Man Without a Country*; for grade VI, *King of the Golden River*, *Tanglewood Tales* and *Nurnburg Stove*. In the primary some sets have been supplemented to meet demands of larger classes and take place of worn out books. Libraries have been started, more particularly in the grammar room and there is a good collection numbered, catalogued and arranged for use. Four reference books in History, two in Nature Study and one in Geography have been added. The idea is to teach the use of books by actual research work in them along with the regular seat text books. Several books are reserved for teachers. These should be added to each year.

The plan of providing recitation room and assistant teacher at the grammar school worked out very well last

year and is doing equally as well this year. I do not wish, however, to be understood as being perfectly satisfied with accommodations provided for school purposes. The condition is not by any means satisfactory and will not be until the town provides accommodations for three regular rooms. When this is done, and provisions made for some of the newer lines of school activities that are considered beyond the experimental stages and are accepted as essentials in places providing what is recognized as superior school opportunities, then will Greenland have what any town should provide and what all towns will soon provide; namely, manual training and domestic science. These subjects are reasonably sure of being in demand in the course of study within a very few years and I would urge consideration of possibility for immediate provision at your next district meeting. I would recommend, if nothing more is possible at this time, a sinking fund of \$100 or \$200 be started this year for purpose of establishing such courses when the Board decides the time and conditions are favorable.

Work in music is progressing creditably. The plan mentioned in my report of last year is still in use, and, under the direction of Miss Hoyt, the well established standard of work is maintained.

The attendance last year was the best and the tardiness the lowest in at least five years. So far this year the attendance is far from what it should be. Attendance is an important factor in determining promotion. Teachers are ready, willing and glad to put in extra time with pupils absent for sickness or any reasonable excuse and have done so, but when pupils are kept out to make a social visit to Grammie in some

other town or kept out when there is a little dew on the grass it is unreasonable to expect much extra help, at least cheerfully given. These are matters largely for direction by the influence of parents and the school record will be a much more commendable asset if the remaining weeks can offset the attendance record made so far this year.

Many of the seats and desks in both rooms are far from hygienic or comfortable for the pupils. Probably they have been in use for over 30 years but they are not right. I would suggest there be included in your estimate for repairs, a small sum to start making the furniture adjustable. Many of the desks and seats are perfectly good for a number of years, and, at a cost of \$2 per seat, adjustable irons can be put on in place of the stationary style now in use. I would recommend 20 or 30 be changed this year. Provision should be made to provide slate blackboard for the front board in the grammar room. This would be no waste in case a new building is ever provided as these boards can be used permanently. Aside from this, I have no recommendations except such as may be readily considered by the Board.

With appreciation for cooperation rendered, this report is respectfully submitted.
